

EMPERADOR

WEEKLY PRICE

February 9, 2026

The background image is an aerial photograph of a large industrial complex. In the foreground, there are numerous black cylindrical storage tanks arranged in several rows. In the upper left corner, there is a white building with a flat roof and some industrial equipment. The ground is a mix of light-colored concrete and darker, possibly asphalt, areas. A large, solid red circle is positioned in the upper right corner of the slide.

WEEKLY REPORT

During 2-8 February 2026, Brent crude prices declined by an average of \$1.15/bl to \$66.19-68.54/bl, despite ongoing Middle East tensions.

Weaker crude values put downward pressure on global bitumen markets, although regional bitumen price movements were mixed.

In **Asia**, Singapore export prices slipped by \$1/t due to weak Southeast Asian demand, while South Korean prices rose by \$8.5/t.

In China, domestic prices were largely stable, though demand stayed weak due to winter conditions and the holiday slowdown.

In India, firm demand from road construction and favorable weather supported bulk import interest, while high drummed inventories continued to limit buying interest.

In the **Middle East**, trading activity slowed amid geopolitical uncertainty, but tight supply lifted bulk export prices by \$1/t.

Bahrain revised its listed prices to \$550/t, while Iraqi export prices continued to rise due to tight feedstock and strong demand.

In **Africa**, bitumen markets were mostly steady, with strong road construction supporting demand. West African import prices were stable, East African import prices edged higher, and South African prices remained unchanged due to ample supply.

The full report is available at the following link:
[Weekly Bitumen Market-February 9](#)

TERMS

Price: Prices are calculated based on 500 tons

Delivery Time: The delivery time commences from the receipt of advance payment in the Seller's account and terminates at the time of submitting the customs documents to the shipping line.

Transit Time: Shipping time is out of the Seller's commitments.

Payment: 30% advance and balance on a scanned copy of the BL

IMPORTANT POINTS

1. The buyer initiates the order.
2. The seller issues the pro forma invoice (contract) to the buyer.
3. Upon receipt of the pro forma invoice, the buyer is required to remit the prepayment via Swift and return the signed document to the seller.
4. Following receipt of the prepayment and the signed pro forma invoice, the seller arranges for the shipment of the cargo and provides the buyer with a scanned copy of the Bill of Lading (BL).
5. Upon receiving the scanned BL, the buyer settles the remaining balance payment.
6. Once the balance payment is received, the seller dispatches the Commercial Invoice, Packing List, Bill of Lading, and Inspection Certificate to the buyer via courier.

Who We Are

Emperador is a trusted bitumen supplier based in the Middle East, serving clients worldwide with an unwavering commitment to quality and service. We guarantee that every shipment meets the highest international quality standards through our comprehensive supply oversight and rigorous quality control processes. Our dedication to transparency sets us apart. We keep you well-informed with daily data sheets and regular shipment updates, ensuring you have complete visibility throughout the entire process. At Emperador, we approach every transaction with the utmost professionalism, ensuring the delivery of premium-grade bitumen and providing consistent customer service.

OUR MISSION

From the initial consultation to the last delivery, we strive to provide our customers with exceptional service. To guarantee prompt, precise, and effective service, we make use of our skilled team and extensive global network of suppliers.

WHAT WE DO?

Our team is dedicated to keeping lines of communication open throughout the procedure, providing daily updates on the status of the shipment, and delivering the highest quality bitumen to our clients all over the world.

TERMS & CONDITIONS

East Africa

East African prices include inspection certificate Q&Q / PVOC / COC by SGS.

West Africa

The West African prices include the inspection certificate by SGS or Geo Chem, according to the buyer's request.

Country-specific documents—such as BESC, FEERI, ECTN, and others—can be prepared by the EMPERADOR team. The cost of these documents will be added to the above prices based on the quantity of the order.

Asia

All cargoes are inspected at the loading port by SGS or Geo Chem, at the seller's account.

The marking on the drums will conform to the buyer's specifications.

Switch BL and House BL will be done by the seller and in the seller's account.
